

No Hyperscale Data Centers IN FLORIDA

STATEWIDE MOVEMENT

67 Counties. One Mission.

One Florida, standing together to protect what matters.

From the Panhandle to the Keys, Floridians are uniting around a single goal: keeping hyperscale data centers out of our communities and protecting the land, water, and power our future depends on.

SHARED MISSION

HOW WE WIN, TOGETHER

- ✓ Every county organizes locally and shares what works statewide.
- ✓ Residents educate their neighbors and show up at commission meetings.
- ✓ Counties adopt protections using the proven Escambia model.
- ✓ The more counties that act, the stronger every community becomes.

Your county is the front line. Find where it stands, and help move it forward.

67 counties. One Florida.
