

No Hyperscale Data Centers IN FLORIDA

A PROVEN MODEL

Escambia County Already Did It

A Florida county already created the roadmap.

Escambia County demonstrated that Florida counties have the authority and the process to adopt full prohibitions on hyperscale and large-scale data centers. Their approach provides a clear model for other counties to follow.

1

July 23, 2026 — Resolution 2026-71 Adopted

Escambia County adopted a resolution memorializing its position and identifying concerns involving electricity, water, wastewater, infrastructure, natural resources, and long-term community benefit.

2

August 6, 2026 — Ordinance 2026-30 Enacted

Escambia County enacted an ordinance expressly banning large-scale data centers within the unincorporated area of the county.

WHY IT MATTERS FOR YOUR COUNTY

- ✓ It proves Florida counties have the legal authority to act.
- ✓ It provides ready-to-adapt resolution and ordinance language.
- ✓ It shows a clear, public process any county can follow.

If Escambia County can protect its land, water, and power, your county can too. The roadmap already exists.

Bring the Escambia model home.

Download the resolution and ordinance on our site.
